

Trustwave SpiderLabs®

Simple is Intelligent.

Who is SpiderLabs?

SpiderLabs is Trustwave's elite security team focused on application security, incident response, penetration testing, physical security and security research — including anti-malware and threat intelligence.

- Thousands of organizations depend on SpiderLabs to detect vulnerabilities, address gaps in security and remediate issues
- SpiderLabs has performed more than 1,500 incident and forensic investigations and more than 15,000 penetration and application security tests in over 50 countries globally
- SpiderLabs publishes the annual Trustwave Global Security Report, where the industry turns to gain insight into the latest threat landscape trends

SpiderLabs' wealth of applied security research and intelligence is injected into our product and services portfolio — serving as the backbone of Trustwave's Unified Security solutions and Trustwave Managed Security Services.

Our Mission

The SpiderLabs mission is to continually deliver the most advanced expertise in information security available in the industry to help protect our customers' digital assets from a growing spectrum of malicious attacks.

To achieve this goal we recruit top talent from the information security community, use standardized methodologies, innovative delivery technology and a centralized QA processes to ensure quality and consistency. We also maintain 6 global research facilities and perform research 24x7 to seek out and identify new and emerging threats.

We provide advanced services and expertise in the following areas:

Response and Investigation

In addition to preparing for an incident, SpiderLabs can respond quickly to provide incident response and forensics services to prevent further loss, including:

- Cyber Forensics Investigations
- Complex Fraud Prevention Services
- Incident Response
- Incident Readiness
- Law Enforcement Training

Analysis and Testing

We provide services from network and application testing and code review to pinpoint vulnerabilities in your environment.

Our 360° Application Security covers:

- Application Penetration Tests
 - Application Code Review
 - Virtual Patch Development
 - Secure Development Training
- Network Penetration Tests
 - External/Internal Network and Wireless
- Mobile Application and Device Tests
- Physical Security Tests
- Social Engineering Tests

Research and Development

Our experience is built on combining discovered, real-world threats with the latest in research and learning for the best in applied security knowledge. This intelligence feeds into our Trustwave Unified Security products to drive enhancements and real-time protection and is also shared with our customers covering:

- Threat Intelligence Services
 - Targeted Email Feeds and Quarterly Reports
 - Trusted Advisory Services
 - Coverage areas:
Mobile, Malware, Infrastructure and Cloud
- Client Driven Security Research
- Malware Reverse Engineering
- ModSecurity Commercial Rules

Why SpiderLabs?

Expertise

Our team consists of many of the top security professionals in the world. With career experience ranging from corporate security executives to security research labs and federal and local law enforcement, our team has the background and dedication to stay ahead of the issues and threats affecting your organization's security posture.

Experience

We have performed thousands of incident response and forensic investigations as well as application and network security penetration tests for customers around the globe — from start-ups to Fortune 50 companies.

Facilities

We maintain the most advanced security testing and research labs in the industry — located in every region across the globe to deliver you the best quality service.

Confidentiality

We work closely with you to ensure that all our services are performed with strict confidentiality and under rigorous legal oversight.

Key Benefits

Superior Insight – our breadth and depth of services provide organizations with unique insight into emerging threats and how to combat them

Leading Experts – Our SpiderLabs team members speak at security conferences around the world — including DEF CON, RSA and Black Hat and have applied security knowledge from providing services for organizations ranging from small start-ups to billion dollar enterprises

Trusted Advisor – Our SpiderLabs team is your trusted advisor to help you prioritize and invest in the right areas to keep your organization secure and business growing

Trustwave is a leading provider of compliance, Web, application, network and data security solutions delivered through the cloud, managed security services, software and appliances.
