PROTECT
Build and maintain technology, processes, and procedures to secure and control access to critical information.

IDENTIFY
Identify assets that support critical business functions, assess risk, govern, and prioritize security efforts.

DETECT
Build systems and intelligence to recognize potential cybersecurity events as they happen.

REMEDiate
Restore affected systems and services to quickly return to normal business operations.

RESPOND
Contain and limit the effects of cybersecurity events through planning and action.

SECURE YOUR DIGITAL WORLD
www.nanjgel.com
**WHAT WE DO**

Nanjgel Solutions is a leading Systems Integrator that provides next-generation innovative solutions & services to help your organization to gain complete VISIBILITY-CONTROL-MANAGEMENT and to help you secure tomorrow’s threats today.

Our frameworks are designed based on industry best practices such as the NIST, ISO & other local regulatory compliance mandates which can either help you to quickly gain Compliance & Certification during the implementation of the Cyber Security Framework.

Nanjgel has been delivering integration projects since 2007 with impressive results and testimonies. We live and breath IT integration, so clients who work with us will have access to experts in this specialist field of Cyber Security. We enable digital transformation through API integration, DevOps and Microservices. Our expert IT integration services include consulting, development, delivery, support and resourcing. Our consultants have experience of open-source and best-of-breed technologies.

We are proud to be the only Cyber Security Systems Integrators that can implement & deliver a fully automated Cyber Security Operations Center.

**WHAT ARE THE PREDICTIONS?**

1. Ransomware Evolution
2. AI & ML Expansion
3. IoT Threats
4. Blockchain Revolution
5. Serverless Apps Vulnerability
6. The decline of Passwords – Only Authentication will last
7. GDPR will make an example of an organization
8. State Sponsored Attacks will increase
9. Automated Threat Detection will increase
10. Trust will be the casualty of the war on Cyber Crime

**KNOWN TO INTRODUCE INNOVATIVE TECHNOLOGIES IN TO THE REGION**

- **ForeScout**
  - First Partner/Reseller for GCC
  - (now with 20+ implementations)

- **Data SunRise**
  - Data audit & Database Security

- **IBM QRadar**
  - QRadar before IBM acquired it

- **Accops**
  - Virtualization Security

- **Looking Glass**
  - Cyber Threat Management

- **Observe IT**
  - Insider Threat Management

- **OSIRIUM**
  - Privileged Access Management
Why Nanjgel?

- Leader in Information security working with the industry leading vendors & customers
- 11 successful years in the Industry with huge customer base in different global location
- Innovative Condorwatch™ Cyber Security Framework (SOC) which helps customers close security gaps and upgrade their defenses by continually building on top of their existing security investments
- Deployed and managing 9+ Security Operation Centers (SOC) across the globe
- Delivering Cybersecurity with a Customer Focused Approach
- In-house Development Team for your custom business requirements
- Skilled and Certified Experts with years of experience in each security domain
- Strong Partnerships with leading IT Security Vendors
- Tailored Solutions to meet mandatory governance, risk and compliance legislations
- Empowering organizations to tackle the rapidly evolving threat landscape
- ISO 27001 & 9001 certified organization
- Winner of “Best Security Integrator” Award of 2018 (6 years consecutively)
- Presence in Middle East, United Kingdom, Europe & India
- Over 12 strategic partners & alliances that address the varied requirements of business and organizations across the world
**IOT & BIG DATA**
- Network Access Control
- Big Data Analytics
- Data Lake
- Elastic Search
- Advanced Analytics

**DATA & APPLICATION SECURITY**
- Data Governance
- Database Activity Monitoring
- Data and Database Security
- Data Encryption & Control
- Enterprise Digital Rights Management
- Data Classification
- Data Loss Prevention
- Data Vulnerability Assessment
- Application Protection
- Vulnerability Assessment & Penetration Testing
- Web Application Firewall

**NETWORK SECURITY**
- Network Access Control
- Next Generation Firewall
- Email Security
- Network IPS
- Web Gateway
- Advanced Persistent Threat
- DDoS Prevention & Mitigation

**USER SECURITY**
- Identity and Access Management
- Single Sign On
- Multi-Factor Authentication
- Privileged Access Management
- Privileged Identity Management
- Privileged User Password Management
- Session Recording
- Endpoint Security Management
- Endpoint Detection & Remediation
- End User Behavior Analysis
- User Activity Monitoring

**SECURITY ORCHESTRATION, AUTOMATION & RESPONSE (SOAR)**
- Incident Response & Orchestration
- Incident Management
- Security Intelligence & Analytics
- Threat Intelligence Services
- Threat Intelligence Platform
- Governance Risk & Compliance
- Cyber Security
- Dark Web monitoring
- Third party Risk monitoring
- Security Information and Event Management (SIEM)
- Threat Hunting
- Malware Hunting
- User and Entity Behavior Analytics

**POLICY, RISK AND COMPLIANCE MANAGEMENT**
- Risk Manager
- Network Configuration and Compliance
- Policy Management Solution
- Data Governance
- Security Assessment
- Vulnerability Assessment and Penetration Testing

**MSSP (CLOUD OFFERINGS)**
- Endpoint Management
- Vulnerability Management
- Multi-Factor Authentication
- PKI / Digital Signature
- Malware Hunting
- Application Scanning
- F.I.M Network Configuration and Compliance
- Security Operations Center
- SIEM as a Service
- Threat Intelligence

**INFRASTRUCTURE SECURITY**
- Virtual Infrastructure Security
- SCADA Security
- Mobile Device Management
- Public Key Infrastructure Certificates
Nanjgel CyberSecurity Framework

- Incident Response & Orchestration
  - SIEM
  - Cyber Threat Management
  - Anti-Phishing
  - Analytics
  - Vulnerability Scanning
  - Privilege User Management
    - Identity Management
    - User Activity Monitoring & Analytics
    - Single Sign-On (SSO)
    - Password Management
    - Multi Factor Authentication
  - Network
    - Access Control
    - Nextgen Firewall
    - IPS / IDS
    - DDOS
    - Email / Web Gateway
    - APT Protection
  - Data
    - DLP
    - Information Rights Management
    - Database Security
    - PKI

  - Application
    - Code Review
    - Web App Firewall
    - Virtual Patching
    - Application
    - Vulnerability Scanning
    - Penetration Testing
- Hardware Enhanced Security
- Infrastructure
FUTURE OF CYBER SECURITY

With advanced cyber security threats it is necessary to have resilient security measures within organizations. It is imperative that different security solutions talk to each other. When a cybersecurity attack takes place it is not possible for human beings to be a part of the processes to help control or cease it. The machine and technology must take this action. And this can only happen if all the technologies are intercommunicating with the right policies and automation in place.

*We at Nanjgel solutions make this a reality by achieving a completely integrated and semi-automated Cyber Security framework.*

Message from Managing Director

Jude Pereira

ACHIEVEMENTS

- **RESELLER 2018**
  Security Reseller of the Year

- **ICT - 2017**
  Security Integrator of the Year

- **HOT 50 - 2016**
  Best Security Integrator

- **LOOKING GLASS - 2016**
  Authorized Partner 2016

- **ICT - 2016**
  Integrator Security Champion

- **IBM - 2015**
  ASL Security Awards

- **EASY SOLUTIONS - 2015**
  EMEA Partner of the Year

- **ICT - 2014**
  Achievement Awards
